PROFESSIONAL SUMMARY

AI/ML Engineer with experience in Generative AI, RAG pipelines and full-stack development. IEEE-published researcher with real-world frontend engineering experience. Focused on building practical, production-ready AI solutions.

EDUCATION

Sri Eshwar College Of Engineering

B.E, CSE (AI and ML) – 8.0 CGPA

Coimbatore, India

Nov. 2022 – Nov 2026

WORK EXPERIENCE

Engineering Trainee

Telesoft Technologies

Jun 2025 – Jan 2026

Onsite – Delhi NCR

- Developed real-time monitoring dashboards for cybersecurity and telecom software using React.js
- Integrated REST APIs to fetch, process, and visualize live data, improving UI responsiveness
- Collaborated with cross-functional teams to ensure system stability and meet product requirements

PROJECTS

PrepWise – AI Interview Coach | LLMs, NLP, Agentic AI, React.js

Mar 2026

- Developed an AI-driven platform for resume optimization and interview preparation using LLM-powered evaluation
- Designed a multi-agent system using LLMs + NLP for personalized feedback and coaching
- Implemented voice-based interview simulations to mimic real-world interview scenarios
- Enhanced candidate readiness and confidence through adaptive evaluation

ASTRA – AI Powered Interactive Guidance System | LLMs, RAG, Generative AI

Aug 2025

- Built a voice-based conversational AI system for real-time navigation using LLM-driven interaction
- Implemented LLM + RAG pipeline for context-aware, accurate responses
- Designed natural language interaction with visual response support to enhance user experience
- Improved response relevance and usability in dynamic query scenarios

Anomaly Detection System | Deep Learning, Python, CNN, LSTM, Streamlit

Jun 2024

- Built a CNN + LSTM-based model to detect suspicious activities in surveillance videos
- Trained on UCF dataset to identify events like shoplifting and assault
- Combined spatial and temporal features to improve detection accuracy and robustness

PUBLICATIONS

Multi-Agent Personalized Interview Coach: An AI-Powered Platform for Career Readiness

Oct 2025

Marching Forward: Redefining Human–Machine Interactions in Conversational AI

Feb 2025

IEEE ICCES, 2024 | DOI: [10.1109/ICCES63552.2024.10859659](https://doi.org/10.1109/ICCES63552.2024.10859659)

ACHIEVEMENTS

Selected among Top 30 out of 250+ applicants, Official Content Creator – KGen.io (gaming & Web3 platform)

Japanese Language Proficiency Test – N5

1st Place – Ideathon, Karpagam College

2nd Place – Hackathon, Sengutar College of Engineering

2nd Place – Project Expo, Karpagam College

TECHNICAL SKILLS

Programming Languages: C, Python, Java

Generative AI: LLMs, RAG, LangChain, Embeddings, Agentic AI Systems, Prompt Engineering

Machine Learning: Deep Learning, Natural Language Processing (NLP), Transformers

Web & Backend: React.js, Node.js, Express.js, REST APIs, HTML, CSS

Core CS: Data Structures & Algorithms (DSA), Operating Systems (OS), DBMS

Tools & Platforms: Git, GitHub, Hugging Face, VS Code, Colab, Canva
